- Prompt estimates
- Providing timely updates
- Problem solving through unparalleled expertise

Aerospace and Defense

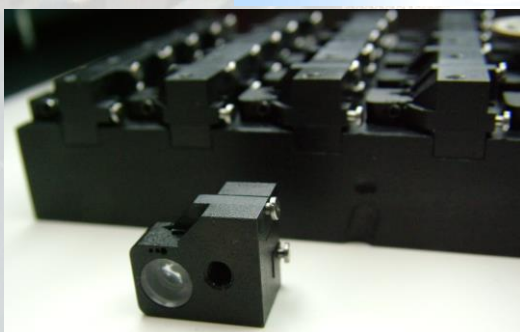

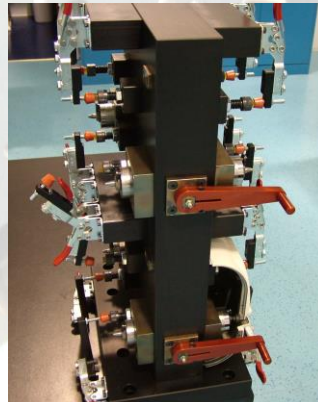

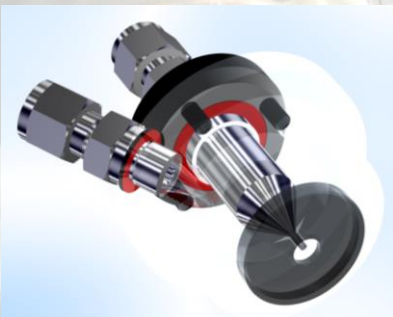

Automotive

Medical Device

Construction

Diligence Incorporated was founded in 1998 to provide manufacturing engineering and consulting services to the metal working industries. The corporation has expanded to provide a specialized service of precision manufacturing through the procurement of quality brand CNC equipment such as Matsuura and Hwacheon.

Bruce Ellingson, President of Diligence, has 40 years in the manufacturing industry. That experience includes almost two decades in professional education. He has taught thousands of prospective engineers and machinists the craft through videos, technical education, and consulting. Bruce also has an uncanny ability to figure out complex technical issues and has authored a 300-page book on manufacturing problem solving.

Call us today, we are ready to listen.
